Patent Application number 10/656/095

GRIP STRENGTH ENHANCEMENT GLOVE AKA HERCULES HANDS

Please note: This is the 3rd go-around. Obviously all direction is very appreciated; however, there seems to be some slight contradictions which we have now tried to overcome.

If it turns out that there needs to be additional 'format' corrections, it seems as I am faxing these final corrections to proper authorities - it would be more expeditious to communicate need for corrections in fax form also - rather than regular mail.
